A couple of updates.

1. I talked with Charles McQuire. He wants to see our draft approval letter. I told him I would send it once we completed our internal review of a draft.
2. I suggest we ask Harry Anthony for a draft of what UEC plans to send to TCEQ for its exemption modification request. This would help expedite approval since Charles has told Harry that TCEQ will not approve any request until it discusses it with EPA. If we can work with UEC on its draft, before it goes to TCEQ, maybe there will be fewer comment letters and followup required.
3. We need to document the 2 monitoring wells. Harry could send us a letter (or better yet, an agreement signed by both UEC and the GW District) on funding, installation timeline, monitoring schedule, who is responsible for long term monitoring, how long, etc. Other ideas on how to get this documented?
